ABSTRACT

Results of the 1986 Attrition/Retention Survey of the State University of New York are presented. After a brief narrative summary of the findings, extensive data on attrition, retention, and completion are provided for: full-time, first-time students and full-time transfer students at the associate and baccalaureate degree levels; and students in "postsecondary opportunity programs" at the associate and baccalaureate degree levels. Trend data for baccalaureate programs are provided for 1974-1986, while trend information for associate programs covers 1976-1986. Attrition and retention data in baccalaureate programs are based on students who entered in fall 1980, 1981, 1982, 1983, 1984, and 1985; data for associate programs cover students who entered in fall 1982, 1983, and 1984. Both headcount and percentage data are presented from a system-wide perspective, by campus type, and by campus. Findings include: for baccalaureate degrees, there was an overall degree completion rate of almost 50%, and an overall attrition rate of about 49%; the highest percentage of degree recipients are reported for the statutory colleges, followed by the specialized colleges, the university centers, and university colleges. INTRODUCTION

This publication summarizes the responses of the State University of New York constituent institutions to the 1986 Attrition/Retention Survey (86-10) administered by the Central Office of Institutional Research. In addition, this report presents trend information on completion, retention and attrition rates of first-time students.

The significant factors in the development of a student's academic career and plans are varied and diverse; consequently, there are innumerable questions that may be asked regarding student retention and attrition. These questions are increasingly important to academic and fiscal planning and evaluation. Any study which involves the tracking of individuals over a period of time tends to be time-consuming and complex. Because of the desirability of designing a study that would yield significant information and still be capable of execution in a reasonable period of time, the questions formulated for purposes of this study have been restricted to those which could be answered by an examination of permanent records and transcripts. Within these restrictions, this study was designed to answer some fundamental questions of the groups examined, e.g., how many received awards and how many did not? Of those that received an award, when was the award received in terms of normal expectations? Of those that did not receive an award, how many were still enrolled? In the case of associate degree programs, how many of those who received an award or did not receive an award and were no longer attending, transferred to another college? More detailed information on the design and assumptions of the study will be found in the section titled "Methodology".

The data presented in this report were collected as of the Fall 1986 semester on: (a) six cohorts of full-time, first-time students in baccalaureate degree programs; (b) six cohorts of full-time, transfer students in baccalaureate degree programs; (c) one cohort of full-time, first-time postsecondary opportunity students in baccalaureate degree programs; (d) one cohort of full-time, transfer opportunity students in baccalaureate degree programs; (e) three cohorts of full-time, first-time students in associate degree programs; (f) three cohorts of full-time, transfer students in associate degree programs; (g) one cohort of full-time, first-time postsecondary opportunity students in associate degree programs and (h) one cohort of full-time, transfer opportunity students in associate degree programs. The inclusion of several cohorts allows for the examination of retention and completion rates without having to wait a full five years for baccalaureate program cohorts or a full three years for associate program cohorts.

This report is organized into four parts. Part One provides attrition, retention and completion information for full-time, first-time and full-time, transfer students in Baccalaureate Degree Programs, including postsecondary opportunity students. In addition, data for first-time and transfer postsecondary opportunity students are presented separately in this section. Part Two contains similar information for students enrolled in Associate Degree Programs. Part Three includes trend data for the State University of New York attrition, retention and completion rates for full-time, first-time students enrolled in Baccalaureate Degree Programs, classes of 1974 through 1986. Part Four provides similar trend information for full-time, first-time students in Associate Degree Programs, classes 1976 through 1986. The tables presented in each part of this report include headcount and percentage data from a system-wide perspective, by campus type and by campus.

The accumulation of information contained in this study involved a great deal of work on the part of individual campuses. We appreciate the cooperation and effort that went into providing these data. We would also like to thank Mr. Gary Blose for developing edit routines for the attrition/retention survey data and table formats for summarizing survey results. We would also like to thank Mr. Roy Spoor and Ms. Susan Bossoni for entering survey data into the computer system. Finally, we would like to thank Mr. Paul Ferguson and Ms. Margaret Rings for their efforts in preparing this publication.

METHODOLOGY

The problem of "measuring" student attrition and retention in an instructional program is complicated by a number of factors - some technical and some conceptual. Among the latter is the fundamental problem of defining the concept of attrition in an operationally significant manner. Regardless of its original meaning, the term 'attrition' as it is used within the context of higher education involves the concept of failure to achieve some goal or objective. It would, consequently, be improper to include within attrition figures a student who entered an undergraduate college and completed only one year of study _if_ that student had no commitment to a program of study leading to a formal degree, or no commitment to a specific goal which was not achieved.

The basic approach utilized in this study was to identify, each Fall, a group of _full-time students enrolled in a degree program_ - called the "total cohort" - and to arrive at attrition/retention information by tracking the cohort through the institution. The reason for selecting a cohort of full-time students enrolled in a degree program was that they, by virtue of their enrollment, expressed a commitment to definable objectives. Specifically, they were committed to (i) full-time study and (ii) attaining a degree. This study is organized so as to provide information regarding the relative success of the cohort in achieving their goals.

The study examines: (i) those students enrolled in Baccalaureate Degree Programs, and (ii) those students enrolled in Associate Degree Programs. If comparisons are made between the two cohorts, a word of caution is advisable. It should be remembered that a student who enrolls in a baccalaureate degree program and leaves the institution after two years without a degree, will be counted as failing to achieve his/her objectives. Whereas, a student enrolled in an associate degree program who receives a degree will have met his/her objectives. Yet, both students _may_ have completed essentially the same course work and performed at essentially the same level of competence. Generally, a four-year institution does not give a formal degree for completing two years of study while a two-year institution does, thus, comparisons between the two cohorts with respect to ability and achievement should be made with caution.

Attrition/retention data in Baccalaureate Degree Programs are based on full-time, first-time and full-time, transfer students who entered in Fall 1980, Fall 1981, Fall 1982, Fall 1983, Fall 1984 and Fall 1985. In addition, data were collected on full-time, first-time and full-time, transfer postsecondary opportunity students in Baccalaureate Programs who entered in Fall 1980. Each cohort was divided into those who received a degree, thereby achieving their baccalaureate educational objectives, and those who did not receive a degree. Of those who did not receive a degree, the number still persisting/still enrolled in the institution, either part-time or full-time, were reported. Degree recipients were also reported in terms of the conventional four-year time frame, i.e. those graduating early, those graduating four years after admission, or those graduating later. All data were collected as of the Fall 1986 semester, therefore, many students in the most recent cohorts will be reported as persisters still enrolled.

It would be incorrect to infer that students who are no longer enrolled have abandoned their educational objectives. They may or may not have abandoned their original goals. All that is known for certain regarding the students who are no longer enrolled is that, for reasons which we do not have, their relationship with the institution has ceased. Again, a cautionary note, the reasons for leaving the institution may be many and varied, e.g., financial, academic, abandonment of original objectives, illness, desire to attend another institution, or any variety of personal and non-personal reasons. Consequently, inferences made from the data regarding students no longer enrolled should be made with caution.

Attrition/retention data in Associate Degree Programs are based on full-time, first-time and full-time, transfer students who entered in Fall 1982, Fall 1983 and Fall 1984. Additionally, data were collected on full-time, first-time and full-time, transfer postsecondary opportunity students in Associate Programs who entered in Fall 1982. The divisions of each cohort are similar but not identical to the divisions utilized for baccalaureate degree students. Consequently, the same cautionary notes apply. The major difference in the case of the associate degree programs is that additional information is provided regarding the number and distribution of students who transferred to another college. This additional information was sought in the case of the associate degree programs since many of these programs are designed to be university parallel programs leading to transfer to another institution.

In interpreting the data for attrition in Associate Degree Programs, it should be noted that those students whose ultimate objective is to receive a baccalaureate degree may, because of limitations on the transferability of credits and other factors, perceive it to be in their best interest not to complete the associate degree program. Consequently, some students may not receive a formal award in a two-year program by prior design. In this instance, therefore, attention should be given to the students who do not receive an associate degree but do transfer to another college.

ORGANIZATON OF ATTRITION/RETENTION TREND DATA

Attrition/retention trend tables summarize the data collected by the attrition/retention surveys for first-time students in Baccalaureate and Associate Degree Programs. The trend tables allow attrition, degree completion and persistence data to be compared across thirteen years for Baccaluareate Programs and eleven years for Associate Programs. Trend tables permit analyses of attrition and retention patterns at the individual campus level, by type of institution and on a university-wide basis.

Baccalaureate trend tables present twelve cohorts of full-time, first-time students entering in Fall 1970, (Class of 1974) through Fall 1982 (Class of 1986). Associate trend data includes ten cohorts of full-time, first-time students entering in Fall 1974, (Class of 1976) through Fall 1984 (Class of 1986). Since the survey format and data collection procedures were modified over the thirteen year period of survey administration, two models have been included, one for Baccalaureate Programs (page xi) and the other for Associate Programs (page xii) to assist in understanding and interpreting the trend data.

Each model contains information about the entering cohort, the number of degree and non-degree recipients and source documentation for the included data. Both headcount and percentage data for degree and non-degree recipient data are presented in a cumulative format. Due to the different survey formats and data collection procedures, the only consistently colected Baccaluareate data are included in the columns labeled "WITHIN 4 YEARS". The "WITHIN 4 YEARS" column includes degree recipients reported up to and during the summer of the fourth year of school or before the Fall of the fifth year. To compare Associate data across the years use the data in the column labeled "WITHIN 2 YEARS". The "WITHIN 2 YEARS" column includes degree recipients reported up to and including the summer of the second year of school or before the Fall of the third year. This is the only comparable information collected over the span of survey administration.

Summary of Data

This is the seventh Attrition and Retention publication of the Central Office of Institutional Research (see Publications List in the Appendix). It reports the results of the 1986 Attrition/Retention Survey of the State University of New York. This publication also includes attrition and retention trend data for first-time students enrolled in SUNY Baccalaureate Programs from 1970 through 1982 (Classes of 1974 - 1986) and in SUNY Associate Programs from 1974 through 1984 (Classes of 1976 - 1986).

Part One presents information on the history of full-time, first-time and full-time, transfer students enrolled in Baccalaureate Programs. First-time and transfer cohorts include those entering Fall 1980 (Class of 1984) through Fall 1985 (Class of 1989). In addition to being included in the attrition/retention information for Baccalaureate Programs, data for postsecondary opportunity students are also presented separately for full-time, first-time and full-time transfer students entering in Fall 1980. Data for each of these cohorts were reported as of the Fall 1986 semester. Both headcount and percentage data are presented from a university-wide perspective, by institution type and by institution.

An examination of the data for the Class of 1984 Baccalaureate Degree Programs indicates an overall degree completion rate of 49.68 percent, and an overall attrition rate of 49.06 percent with 1.26 percent of the entering cohort still enrolled six years after admission. At the institutional level, the highest percentage of degree recipients were reported for the Statutory Colleges (82.03 percent), followed by the Specialized Colleges, which were represented by one campus (68.51 percent), next the University Centers (53.04 percent), followed by the University Colleges (44.33 percent). At the institutional level, attrition rates for full-time, first-time students in Baccalaureate Programs followed a similar pattern. The lowest percentage of attrition was reported by the Statutory Colleges (17.36 percent), next the Specialized Colleges (31.49 percent), followed by the University Centers (45.64 percent) with the highest percentage of attrition reported by the University Colleges (54.37 percent). An examination of survey responses by institution demonstrates that there were exceptions to University and institutional norms for first-time Baccalaureate students.

Data on the overall degree completion rate of full-time, transfer Baccalaureate students, indicate that 64.14 percent of the Fall 1980 entering cohort completed a Baccalaureate Degree Program within six years. Moreover, Baccalaureate students transferring at the upper division level have the highest degree completion rate, 68.94 percent, while lower division transfers have a 56.40 percent degree completion rate after six years. These data indicate that transfer students in Baccalaureate Programs are more likely to complete a degree program than the first-time students. This was particularly true for students transferring at the upper division program level. Attrition levels for transfer Baccalaureate students (35.16 percent) are lower than for first-time students (49.06 percent) with upper division transfers having the lowest percentage of attrition (30.50 percent), followed by lower division transfer students (42.84 percent). An examination of Baccalaureate transfer attrition and retention data indicates exceptions by institutional type and at the campus level.

Postsecondary opportunity students are included in the attrition and retention data for Baccalaureate Degree Programs and are also presented separately for full-time, first-time and full-time, transfer students entering Fall 1980. Data were reported as of the Fall 1986 semester. Both headcount and percentage information are provided.

Examination of the data for first-time opportunity students indicates an overall Baccalaureate degree completion rate of 24.09 percent and an attrition rate of 74.09 percent after six years. These completion and attrition percentages for first-time, opportunity students are comparable to the completion/attrition percentages for this cohort from the previous year. Individual campuses differed from these data patterns.

Degree completion rates improve significantly for transfer opportunity students in Baccalaureate Programs (43.24 percent), with a 35.06 percent completion rate for lower division transfers and a 59.34 percent completion rate for upper division transfers. Attrition rates also improve for transfer opportunity students when compared to first-time opportunity students in Baccalaureate Programs. The overall attrition rate for the transfer opportunity cohort was 56.08 percent with a 60.92 percent attrition rate for lower division transfers and 40.66 percent attrition rate for upper division transfer students. Generally, transfer cohorts have higher completion and lower attrition rates than first-time cohorts. This was also the case for postsecondary opportunity students in Baccalaureate Programs, although their graduation rates were lower and their attrition rates were higher than for other students enrolled in Baccalaureate Programs. Completion and attrition rates for transfer opportunity students varied widely by type of institution.

Part Two presents headcount and percentage tables for full-time, first-time and full-time, transfer students in Associate Degree Programs entering Fall 1982, Fall 1983 and Fall 1984. Data for postsecondary opportunity students are included in the attrition and retention tables for Associate Programs and also reported separately for full-time, first-time and full-time transfer opportunity students. Data for each cohort was measured as of the Fall 1986 semester.

An examination of data for the Class of 1984 Associate Degree Programs shows an overall degree completion rate of 41.14 percent for full-time, first-time students with 16.27 percent of the degree recipients transferring to another institution and 4.73 percent of the entering cohort still enrolled after four years. The total attrition rate for the Class of 1984 was 53.38 percent and 15.30 percent of those who left the University without a degree transferred to another institution. At the institutional level, the Agricultural and Technical Colleges had a higher percentage of degree recipients (58.68 percent) and a lower attrition rate (38.78 percent) than the Community Colleges who had a degree completion rate of 36.24 percent and an attrition rate of 57.45 percent. The percentage of students who transferred to another institution after earning an Associate Degree was higher for the Agricultural and Technical Colleges (19.83 percent) than for the Community Colleges (15.28 percent). However, the percentage of students who transferred after leaving the institution without a degree was higher for the Community Colleges (17.06 percent) than for the Agricultural and Technical Colleges (9.02 percent). Furthermore, the percentage of students from the entering cohort still enrolled after four years was higher for the Community Colleges (5.40 percent) than for the Agricultural and Technical Colleges (2.35 percent). Exceptions to these norms were evident at the individual campus level.

Data reported on the overall degree completion of full-time, transfer Associate students entering Fall 1982 show a higher degree completion rate (47.30 percent) than for first-time students (41.14 percent), and a lower attrition rate (48.77 percent) than for first-time students (53.38 percent). However, when compared to first-time students, fewer transfer degree recipients (13.23 percent) and fewer transfer students who left without a degree (8.02 percent), transferred to another campus. For first-time students the post-graduation transfer rate was 16.27 percent and the transfer rate for those who left without a degree was 15.30 percent. At the Associate institutional level, a completion and attrition pattern similar to that of the first-time students emerged. The Agricultural and Technical Colleges had a higher percentage of degree recipients (64.69 percent) and a lower percentage of students who left the institution without a degree (33.85 percent) than the Community Colleges who had 43.13 percent completion and 52.33 percent attrition rates for transfer students. The Community Colleges had a higher percentage of students still enrolled after four years (3.39 percent) than the Agricultural and Technical Colleges (1.38 percent) while the Agricultural and Technical Colleges had higher transferral rates after graduation (27.39 percent) than the Community Colleges (10.38 percent). For students who left the University without a degree, the transfer rates were similar for Community Colleges and Agricultural and Technical Colleges, i.e., 8.08 and 8.61 percent respectively. An examination of data at the campus level indicates several exceptions to the above University and institutional norms.

Postsecondary opportunity students are included in the attrition and retention data for full-time, first-time and full-time transfer students enrolled in Associate Degree Programs and also presented separately. Data include both headcount and percentage tables for full-time, first-time full-time, transfer students entering Fall 1982. Data were reported as of the Fall 1986 semester.

An examination of the data for first-time opportunity students indicates an overall Associate Degree completion rate of 30.07 percent and with 11.19 percent of degree recipients transferred to another institution. This degree completion rate (30.07 percent) was higher than the completion rate of first-time opportunity students in Baccalaureate programs (24.09) and lower than the completion rates of other first-time Associate students (41.14 percent). The total percentage of attrition for first-time Associate opportunity students was 63.09 percent with 10.92 percent of those students transferring to another institution. The attrition rate for Associate first-time opportunity students was lower than the attrition rates of first-time Baccalaureate opportunity students (74.09 percent) and higher than the attrition rates of other first-time Associate students (53.38 percent). The Agricultural and Technical Colleges had higher completion rates for the Class of 1982 first-time opportunity students (42.02 percent) than did the Community Colleges with 22.84 percent. An inspection of campus responses by institution indicates exceptions to the University and institutional normative data patterns for first-time Associate opportunity students.

The full-time, transfer cohort of opportunity students entering Fall 1982, had an Associate Degree completion rate of 36.36 percent and an attrition rate of 55.11 percent. The transfer rates for degree recipients and for students who left the University without a degree was approximately the same at 6.25 percent. The overall degree completion pattern was similar to other first-time and transfer cohort comparisons. As discussed, the degree completion percentages were higher for transfer cohorts when compared to those of first-time students. The student attrition rates followed the established pattern and were lower for transfer opportunity students (55.11 percent) than for first-time opportunity students (approximately 63.09 percent) in Associate Programs. Due to the low number of transfer opportunity students enrolled in Associate Degree Programs caution should be exercised when interpreting these data.

Summary of Trend Data

Part Three includes attrition and retention information for full-time, first-time students enrolled in SUNY Baccalaureate Degree Programs from 1970, Class of 1974 through 1982, Class of 1986. Both headcount and percentage data are presented from a university-wide perspective, by type of institution and by institution.

An examination of the degree recipient data earned within four years for all Baccalaureate Degree Programs indicates a general decline of approximately 11.60 percent in the number of degrees conferred within a four year period, from 51.14 percent for the Class of 1974 to 39.54 percent for the Class of 1986. An examination of total degree recipient data, i.e., four, five or six years after entering for the Classes of 1974 through 1985, indicates a decline of approximately 4.6 percent in the total number of Baccalaureate degrees received. Since the class of 1985 will most likely increase the number of total degree recipients by an additional 2 percent during the sixth year, the total degrees earned for the Class of 1985 will reach approximately 52 percent. Thus, the magnitude of decline in total Baccalaureate degrees received from 1974 through 1985 is approximately 2.5 percent. In sum, these data indicate that for the Classes of 1974 through 1985, there was a slight decline in the total number of Baccalaureate degrees earned and an increase in the number of years needed to complete a Baccalaureate degree.

Due to the variety of survey formats and the different data collection procedures used over the thirteen (13) year span of survey administration, one must exercise care when comparing attrition and persistence rates across years. However, it does appear that a larger percentage of students are remaining beyond the traditional four year time period to earn a Baccalaureate degree. In addition, it appears that SUNY attrition levels have increased, particularly from Fall 1974 through Fall 1979.

At the institutional level, the University Centers and Colleges follow total Baccalaureate degree recipient patterns similar to the University as a whole. For the Classes of 1974 through 1985, total degree recipients declined slightly and the number of years needed to complete a Baccalaureate degree increased. However, data for University Centers indicate a higher percentage of degree recipients within four years and a smaller percentage of decline over a twelve year period than the University Colleges. The Statutory Colleges do not follow the University norms for degree recipient data within four years. Data for the Statutory Colleges indicate an increase in the percentage of within four year degree recipients for the Classes of 1974 through 1985 in addition to having the highest percentage of total degree recipients of all the institutional types. An examination of data at the individual campus level indicates exceptions to these data patterns.

Part Four summarizes attrition and retention information for full-time, first-time students enrolled in SUNY Associate Degree Programs from 1974, (Class of 1976), through 1984, (Class of 1986). Both headcount and percentage data are included from a university-wide perspective, by type of institution and by institution.

An examination of the degree recipient data earned within two years for all Associate Degree Programs indicates a general decline of approximately 14 percent in degrees received within two years, from 39.72 percent for the Class of 1976 to 25.46 percent for the Class of 1986. An examination of the total degree recipient data, i.e., two, three and four years after entering, for the classes of 1976 through 1985, indicates a decline of approximately 5 percent in the total degree recipients in Associate Programs. Since the class of 1985 will most likely increase the number of total degree recipients by an additional 2 to 3 percent during the fourth year, the total degrees earned for the class of 1985 will reach approximately 39.5 percent. Consequently, there is a decline of approximately 2 to 3 percent in the total Associate degrees earned from the entering cohorts, Classes of 1976 through 1985. Thus, there has been a relatively small decline in the percentage of students who have completed Associate Degree Programs from the Classes of 1976 through 1985 and students are taking up to two years longer to complete their degree programs.

At the institutional level, the Community Colleges follow a degree recipient pattern similar to the University-wide norm for Associate Degree Programs. In particular, the Community Colleges have a decline in the percentage of within two year degree recipients from the Classes of 1976 through 1986. However, the percentage of total degree recipients remains relatively stable over the same time period when consideration of the degrees earned after three and four years is included. The Agricultural & Technical Colleges have a larger percentage and a more stable number of within two year degree recipients from the Classes of 1976 through 1986 than do the Community Colleges.

FOOTNOTES

Baccalaureate Transfer Students

[a] All SUNY Baccalaureate Programs are represented by these data, however, the lower and upper division figures exclude SUNY Albany for cohorts entering in 1980 and 1981. Therefore, the sum of the lower and upper division numbers for the Baccalaureate and University Center aggregates do not equal the totals for these years.

[b] The Health Sciences Centers have no lower division transfer students enrolled in Baccalaureate Programs.

[c] The 1980 "Upper Division" transfer cohort includes 10 MRA certificate students, therefore, the sum of degrees, persister and attrition figures will be 10 less than the total.

[d] Since the State College of Optometry does not offer Baccalaureate Degree Programs, they are not included in the Specialized Colleges data.

[e] Maritime College has no full-time upper division transfer students enrolled in Baccalaureate Programs.

[f] The College of Technology - Utica/Rome has no lower division transfer students in Baccalaureate Programs.

[g] Fashion Institute of Technology does not enroll lower division transfer students in Baccalaureate Programs.

FOOTNOTES

BACCALAUREATE TRANSFER OPPORTUNITY STUDENTS

a The following State University of New York campuses have no transfer opportunity students enrolled in Baccalaureate Programs and are not included in the table: Empire State, Buffalo Health Sciences Center, Brooklyn (HSC), Environmental Science & Forestry, Maritime, Optometry, Ceramics, and Industrial & Labor Relations, Veterinary Medicine at Cornell.

b The total figures include all of the State University of New York Baccalaureate Programs enrolling transfer opportunity students, however, the lower and upper division figures exclude the State University of New York at Albany. Thus, the sum of the lower and upper division numbers for Baccalaureate and University Center aggregates will not equal the totals.

c Buffalo College, New Paltz, Old Westbury, Purchase, and Human Ecology at Cornell have no upper division transfer opportunity students.

d Health Sciences Centers (Stony Brook and Syracuse), Technology - Utica/Rome, and Agric. & Life Sciences and Ind. & Labor Relations at Cornell have no lower division transfer opportunity students.

FOOTNOTES

Associate Degree Full-time, First-time Students

[a] The total attrition figures represent all SUNY Associate Degree Programs. The data in the columns labeled "Transferred" and "Did Not Transfer" exclude the following campuses: Syracuse (1982 only), Empire State, Cobleskill, Broome, Clinton, Finger Lakes, Mohawk Valley, Onondaga, Orange County, Schenectady, Ulster and Westchester. The sum of these two columns, therefore, will not equal the total attrition figures for the aggregated attrition data.

[b] The sum of the postgraduate status of degree recipients will not equal the total number of degree recipients due to the exclusion of the following campuses: Empire State, Clinton, Dutchess (1984 only), Finger Lakes, Orange County, Schenectady and Westchester.

[c] Clinton has both a student prison population and a student military population which unduly influence the attriton and retention rates on that campus.

[d] Data for 1984 entering cohort at Nassau Community College includes 76 certificate students which they will try to eliminate in the future.

FOOTNOTES

Associate Degree Full-time, Transfer Students

[a] The total attrition figures represent all SUNY Associate Degree Programs. However, data in the columns labeled "Transferred" and "Did Not Transfer" exclude the following campuses: Syracuse (1982 and 1983 only), Forestry, Empire State, Alfred, Cobleskill, Broome, Cayuga, Clinton, Finger Lakes, Mohawk Valley, Onondaga, Orange County, Schenectady, Ulster and Westchester. The sum of these two columns, therefore, will not equal the total attrition figures for the aggregated data.

[b] The sum of the postgraduate status of degree recipients will not equal the total number of degree recipients due to the exclusion of the following campuses from the post graduate figures: Forestry, Empire State, Clinton, Finger Lakes, Onondaga, Orange County, Schenectady and Westchester.

FOOTNOTES

a Since the following campuses have no first-time postsecondary students enrolled in Associate Degree Programs, they are not included in the table: Adirondack, Clinton, Columbia-Greene, Corning, Herkimer, Nassau, Niagara, North Country, Sullivan and Tompkins-Cortland.

b The total attrition figures will not equal the sum of the columns labeled "Transferred" and "Did Not Transfer", due to the exclusion of the following campuses from the transfer status figures: Broome, Cayuga, CC Finger Lakes, Genesee, Mohawk Valley, Onondaga, Schenectady, and Ulster.

c The post graduate status of degree recipients will not equal the total number of degree recipients due to the exclusion of the following campuses from the post graduate status figures: Cayuga, CC Finger Lakes, Onondaga and Schenectady.

FOOTNOTES

a The following campuses are not included in the table since they do not have transfer opportunity students enrolled in Associate Degree Programs: Environ. Sci. & Forestry, Alfred, Morrisville, Adirondack, Clinton, Columbia-Greene, CC Finger Lakes, Corning, Fulton-Montgomery, Genesee, Herkimer, Nassau, Niagara, North Country, Sullivan, Tompkins-Cortland, and Ulster.

b The total attrition figures represent all of the State University of New York Associate Degree Programs. However, data in the columns labeled "Transferred" and "Did Not Transfer" exclude the following campuses: Broome, Cayuga, Mohawk Valley, Onondaga, and Schenectady.

c The post graduate status of degree recipients will not equal the total number of degree recipients due to the exclusion of Cayuga, Dutchess, and Onondaga from the post graduate figures.

*All Baccalaureate Degree Programs are included in this publication. However, the aggregate for 'All Baccalaureate Degree Programs' does not include Empire State College or Environmental Science & Forestry which lacked complete data for all the included years. The Health Sciences Centers, College of Technology at Utica/Rome, Optometry, and Veterninary Medicine do not have first-time students enrolled in Baccalaureate Programs.

* The 'Total Cohort Number' does not equal the sum of its parts due to the rounding of percentage data.

** All SUNY Associate Degree Programs are included in this publication. However, the aggregate for 'All Two Year College Programs' does not include Empire State College, Environmental Science & Forestry or Syracuse Health Sciences Center due to incomplete attrition and retention data for the included years.

***Clinton Community College revised its attrition and retention data from the 85-10 Survey. The amended figures are included in this table for the first time and are different from the data previously reported in the 4-87 publication.

FOOTNOTES

[a] Original constituent institutions of the State University of New York at its establishment in 1948.

[b] Date of establishment as a state college or institution.

[c] Date of incorporation into State University of New York.

[d] As of July 1, 1975, New York City Community College and the other community colleges (not shown here) sponsored by the New York City Board of Higher Education were no longer a part of the State University of New York.

NOTE: Dates preceding date indicated for establishment as a state college or institution refer to institutional antecedents of the present college or university. These my have been private institutions or controlled by a governmental entity other than the state. Intermediate institutional developments such as other college affiliation or date of first baccalaureate program offering have been omitted for the sake of brevity.

*The Health Sciences Centers at Buffalo and Stony Brook are shown separately here from their respective core campuses.
